

Science Biography

My name is Miss Coates and I have been teaching at Hanbury's Farm for 5 years, and I have been leading Science for the past 4.

I have always been fascinated with Science; finding out things about the physical and natural world has always sparked my curiosity. I have a particular interest in Biology, which I studied at A-level. I have two younger cousins, who I always take out to explore the world around us, from bird watching to mini-beast hunting!

In the classroom, I love to see, and be apart of, children discovering ideas and phenomenon for the first time; the joy on their faces when they have used their learning to prove/disprove a theory or answer a question is fantastic.

Our vision across the Federation is to equip all children with the knowledge, skills, confidence and motivation to develop Science in further education and life.
